U.S. Patent and Trademark Office PTOL-303 (Rev. 7-05)

OL-303 (Rev. 7-05) Advisory Action Before the Filing of an Appeal Brief

John in Cooney Primary Examiner Art Unit: 1711 Continuation of 11. does NOT place the application in condition for allowance because: in regards to the rejection under 35 USC 112 1st, applicants are establishing a range of values not previously contemplated based on value points from examples for particular compositions which are not representative of the range of compositions defined by the claims for which the range of values is defining. Applicants' originally filed supporting disclosure is not supportive of the ranges of values for the compositions as claimed based on the disclosed compositions of the examples. In regards to the rejection under 35 USC 103, it is maintained that Plummer et al. is looked to for its disclosure of hollow inorganic microspheres to resolve the deficiencies of EP-'903. That Plummer et al. may disclose other materials in its disclosure does not negateits proper combination with EP-'903. Plummer et al. is concerned with balancing strength and bouyancy effects associated with their selected spheres. Employment of any of these for their respective effects are within what Plummer et al. may be looked to in resolving the deficiencies of EP-'903. Additionally, Plummer et al. is not the reference being modified, but rather, its teaching is being looked to to modify the teachings of EP-'903.
